PROFESSIONAL SUMMARY

MSc-level Data Analyst and Full-Stack Developer with expertise in end-to-end analytics, web development, and hospitality technology solutions. Proven track record of delivering data-driven insights that drive cost savings, revenue growth, and operational efficiency. Expert in Excel (Power Query, advanced formulas), Python (pandas, API integration), SQL (data modelling, performance tuning), and full-stack web technologies (React, Node.js, PHP). Successfully developed intelligent hotel management systems including AI-powered virtual concierges, chatbots, and booking platforms.

CORE SKILLS

- Data Analytics: Excel (Power Query, PivotTables, EDATE, AVERAGEIFS), SQL (joins, CTEs, window functions), Python (pandas, JSON parsing, API integration)
 - Full-Stack Development: React, Node.js, PHP, JavaScript, HTML/CSS, WordPress, REST APIs
 - Hospitality Technology: AI Chatbots Development, Virtual Concierge Systems Development, PMS Integration
 - Data Visualization: Power BI, Tableau, Excel Dashboards, Interactive Reporting
 - Business Intelligence: ETL Automation, KPI Development, Stakeholder Reporting, Process Optimization
-

PROFESSIONAL EXPERIENCE

Night Guest Service Assistant

Ibis Styles, Leeds, West Yorkshire | Sept 2023 – Present

- Managed night audit procedures and financial reconciliation, processing payments and generating daily revenue, occupancy, and operational reports for management review
- Delivered exceptional 24/7 guest service including check-ins, reservations management, and complaint resolution while maintaining Accor brand standards
- Operated Property Management System (Opera PMS) for bookings, room assignments, and cross-departmental coordination with housekeeping and maintenance teams
- Conducted security monitoring, emergency response, and incident management as first responder during overnight operations

Data Analyst

Qalhata Technology, Sale, Cheshire | Dec 2024 – Present (Freelance)

- Automated Excel-based performance dashboards, reducing reporting cycle by 80% and enabling real-time decision making
- Developed SQL data models to aggregate sales, delivery, and operational metrics, improving query performance by 50%
- Built Python scripts to integrate external data feeds and maintain up-to-date store and product metadata
- Delivered weekly presentations to executives, contributing to a 20% increase in client project uptake

Data Analyst (Contract)

Eden Health Care Private, Leeds | June 2024 – Dec 2024

- Designed a cost-saving dashboard that identified £30,000 in variable cost reductions and eliminated 5 months of manual reporting
 - Created interactive Excel and Power BI visualizations tracking patient metrics, staffing efficiency, and resource utilization
 - Mentored 30+ colleagues on analytics tools and best practices, accelerating departmental adoption by 60%
-

RECENTLY COMPLETED PROJECTS

Hospitality Technology Solutions

Ibis Styles Leeds Virtual Concierge System

***(This is my personal project, and not in use by Ibis hotel)**

- Developed AI-powered virtual concierge with glass-morphic UI design for enhanced guest experience
- Can be integrated into hotel Property Management System (PMS)
- Built multilingual support (English, French, Spanish) with automated translation capabilities
- Deployed on bhenmedia.com showcasing full-stack development skills (React, Node.js, REST APIs)

Hotel AI Chatbot & Automation System

- Created intelligent chatbot handling guest inquiries, booking modifications, and service requests 24/7
- Implemented Natural Language Processing (NLP) for understanding guest intent and context
- Reduced front desk workload by 40% through automated responses to common guest questions

Custom Hotel WordPress Theme & Booking System

- Converted virtual concierge into fully functional WordPress theme for hotel websites
- Built custom enrolment modals, service cards with icons, and interactive UI components
- Integrated payment gateway (Stripe) for secure online bookings and reservations, and also room service.

Data Analytics & Business Intelligence

Costa Coffee UK Performance Dashboard

- Scraped 200+ store locations via Python and Google Places API; parsed and deduplicated JSON data
- Modelled sales, margin, and delivery KPIs in SQL; built Excel metrics for rolling averages, MoM changes, and predictive revenue
- Delivered 9 executive-level visuals with dynamic timeline slicers, regional filters, and branded styling

Global Assessment Dashboard – McKinsey Solve

- Analysed 4,000+ synthetic assessment records in Excel to uncover score drivers by demographics, education, and game engagement
- Designed performance gauges, pass/fail maps, and resume-score correlation charts; recommended targeted prep initiatives

Healthcare Operations Dashboard – Onyx Data DNA Challenge

- Processed 55,000+ synthetic patient records to map condition prevalence, billing trends, and hospital performance
- Created two-page Excel report with multi-chart layouts, filtering by condition, insurance, and provider; delivered resource allocation recommendations

Spotify Streaming Insights (2010–2019)

- Built Excel-based analysis of decade-long streaming data to identify top artists, genres, and playlist impacts
- Developed segmentations by release year, audio features, and chart presence, visualized trends with PivotTables and charts

Pizza Sales Optimization (SQL + Excel)

- Leveraged SQL and Excel to analyse 21,350 orders (£817,860 revenue), identifying top-selling pizzas and peak ordering periods
- Generated actionable insights on inventory planning and promotional targeting to maximize weekend sales

EDUCATION

MSc Data Science – Leeds Beckett University

BSc Information Technology / Business Information Systems – Middlesex University (Second Class Upper Division)

Advanced Diploma in Software Engineering – Aptech Computer Education (Credit)
Web Development – Distinction
