PROFESSIONAL SUMMARY

MSc-qualified Data Analyst with proven expertise in healthcare analytics, KPI monitoring, data quality auditing, and IT systems support. Founder of BhenMedia.com, providing data analytics solutions and business intelligence services. Demonstrated success delivering £30,000 cost savings through data-driven dashboards in healthcare settings and reducing reporting cycles by 80% through Excel automation. Expert in advanced Excel (Power Query, PivotTables, complex formulas), SQL (data modelling, performance tuning), Python (pandas, API integration), and Microsoft Office suite. Experienced in collaborating with clinical and operational staff to improve data accuracy, monitor performance metrics, and provide technical support. Known for exceptional attention to detail, accuracy in data validation, and ability to translate complex data into actionable insights for stakeholders.

CORE COMPETENCIES

Data Analytics & Quality Management

- Advanced Excel: Power Query, PivotTables, VLOOKUP, INDEX-MATCH, EDATE, AVERAGEIFS, data validation, conditional formatting
- SQL: Complex queries, joins, CTEs, window functions, data modelling, performance optimization
- Python: pandas, data manipulation, API integration, automation scripts, JSON parsing
- Data Quality: Auditing, validation, breach coding corrections, anomaly detection, accuracy verification
- KPI Monitoring: Dashboard creation, performance metrics, trend analysis, reporting automation

Technical & IT Support

- IT Systems Support: Troubleshooting, password management, user account creation, system access administration
- Microsoft Office Suite: Excel, Power Bi, Word, PowerPoint, Access, Outlook - advanced proficiency across all applications
- Data Visualization: Power BI, Tableau, Excel charts and graphs, interactive dashboards
- Hardware Support: Printer and scanner troubleshooting, peripheral device configuration

Professional Skills

- Stakeholder Communication: Presenting insights to clinical staff, managers, and executives
- Training & Mentoring: Coached 30+ colleagues on analytics tools and data quality best practices

- Attention to Detail: Proven track record in data accuracy and identifying discrepancies
 - Confidentiality & Compliance: Experience handling sensitive healthcare data with strict confidentiality protocols
-

KEY PROJECTS & ACHIEVEMENTS

Kenneros Healthcare Analytics & Performance Dashboard

- Developed comprehensive healthcare analytics dashboard for Kenneros Healthcare tracking patient flow, admission rates, treatment outcomes, and departmental performance metrics
- Built automated Excel and SQL reporting system reducing manual data collection time by 70% while improving data accuracy and audit trail compliance
- Conducted data quality audits identifying and correcting data entry discrepancies, implementing validation rules to prevent future errors
- Collaborated with clinical and administrative staff to design KPI dashboards monitoring waiting times, bed occupancy, and resource utilization for operational decision-making

Healthcare Operations Dashboard – Onyx Data DNA Challenge

- Processed 55,000+ patient records using Excel and Power BI to map condition prevalence, billing trends, and hospital performance metrics
- Created comprehensive two-page Excel report with multi-chart layouts, dynamic filtering by condition, insurance, and provider; delivered resource allocation recommendations

Costa Coffee UK Performance Dashboard

- Scraped and processed 200+ store locations via Python and Google Places API, cleaning and deduplicating JSON data for analysis
- Modelled sales, margin, and delivery KPIs using SQL; built Excel dashboards with rolling averages, month-over-month changes, and predictive revenue analytics
- Delivered 9 executive-level visualizations with dynamic timeline slicers, regional filters, and professional formatting for management reporting

Global Assessment Dashboard – McKinsey Solve

- Analysed 4,000+ assessment records in Excel using advanced formulas and PivotTables to uncover performance drivers by demographics and engagement
- Designed performance gauges, pass/fail analysis maps, and correlation charts; provided targeted recommendations for improvement initiatives

Pizza Sales Optimization (SQL + Excel)

- Leveraged SQL queries and Excel analysis to process 21,350 orders (£817,860 revenue), identifying top-selling products and peak demand periods
- Generated actionable insights for inventory planning, promotional targeting, and operational efficiency to maximize weekend sales performance

Spotify Streaming Insights (2010–2019)

- Built comprehensive Excel-based analysis of decade-long streaming data using Power Query, advanced formulas, and PivotTables
- Developed segmentations by release year, audio features, and chart presence, visualized trends with professional charts and interactive dashboards

PROFESSIONAL EXPERIENCE

Data Analyst

Qalhata Solutions, Milton Keynes | Jan 2025 – Present

- Automated Excel-based performance dashboards using Power Query and advanced formulas, reducing reporting cycle by 80% and enabling real-time decision making for management
- Developed SQL data models to aggregate sales, delivery, and operational metrics with complex joins and CTEs, improving query performance by 50%
- Built Python scripts to integrate external data feeds via APIs, maintaining up-to-date metadata and ensuring data accuracy across systems
- Delivered weekly presentations to executives with data visualizations and actionable insights, contributing to 20% increase in client project uptake
- Provided first-line IT support for data systems, troubleshooting technical issues and coordinating with IT department for rapid resolution

Data Analyst (Contract) – Healthcare Sector

Eden Health Care Private, Leeds | Dec 2023 – Jan 2025

- Designed and implemented cost-saving dashboard identifying £30,000 in variable cost reductions through detailed data analysis and KPI monitoring, eliminating 5 months of manual reporting
- Created interactive Excel and Power BI visualizations tracking patient metrics, staffing efficiency, resource utilization, and clinical performance indicators
- Conducted data quality audits, identified inaccuracies in healthcare records, and implemented validation procedures to ensure data integrity and compliance
- Collaborated with clinical staff and operational managers to feedback data trends, supporting improved team performance and decision-making
- Mentored 30+ colleagues on analytics tools, Excel best practices, and data quality procedures, accelerating departmental adoption by 60%
- Maintained confidential patient information systems, ensuring strict adherence to data protection protocols and healthcare compliance standards

Night Guest Service Assistant

Ibis Styles Leeds | Sep 2023 – Present

- Managed night audit procedures and financial reconciliation with 100% accuracy, processing payments and generating daily revenue, occupancy, and operational reports
- Operated Property Management System (Opera PMS) for bookings, room assignments, guest profile management, and cross-departmental coordination
- Provided first-line IT support including troubleshooting printer/scanner issues, password resets, user account management, and system access administration
- Delivered exceptional attention to detail in data entry, record-keeping, and incident documentation, ensuring operational continuity between shifts

Founder & Owner [BhenMedia](#)

[Bhenmedia](#) | 2017 – Present

- Founded technology consulting business specializing in data analytics, business intelligence, and IT systems support for diverse clients
 - Deliver advanced Excel solutions (Power Query, complex formulas, PivotTables), SQL databases, and Power BI dashboards for KPI monitoring and operational reporting
 - Provide data quality auditing, validation procedures, and automated reporting systems to improve accuracy and reduce manual data processing
 - Offer technical support including system troubleshooting, user training, and data migration services for analytics platforms and business systems
-
-
