PROFESSIONAL SUMMARY

MSc-level Data Analyst with demonstrated success in end-to-end analytics, dashboarding, and process automation. Expert in Excel (Power Query, advanced formulas), Python (pandas, API integration), SQL (data modeling, performance tuning). Proven ability to translate complex data into strategic insights that drive cost savings, revenue growth, and operational efficiency.

CORE SKILLS

- Excel (Power Query, PivotTables, EDATE, AVERAGEIFS)
- SQL (joins, CTEs, window functions)
- Python (pandas, JSON parsing, API integration)
- Data Modeling & ETL Automation
- Dashboard Design & KPI Development
- Power BI & Tableau Visualization
- Stakeholder Reporting & Presentation

PROFESSIONAL EXPERIENCE

Data Analyst – Qalhata Solutions, Milton Keynes

Dec 2024 – Present

- Automated Excel-based performance dashboards, reducing reporting cycle by 80% and enabling real-time decision making.
- Developed SQL data models to aggregate sales, delivery, and operational metrics, improving query performance by 50%.
- Built Python scripts to integrate external data feeds and maintain up-to-date store and product metadata.
- Delivered weekly presentations to executives, contributing to a 20% increase in client project uptake.

Data Analyst (Contract) – Eden Health Care Private, Leeds

Aug 2023 – Dec 2024

- Designed a cost-saving dashboard that identified £30,000 in variable cost reductions and eliminated 5 months of manual reporting.
- Created interactive Excel and Power BI visualizations tracking patient metrics, staffing efficiency, and resource utilization.
- Mentored 30+ colleagues on analytics tools and best practices, accelerating departmental adoption by 60%.

SELECTED PROJECTS

Costa Coffee UK Performance Dashboard

- Scraped 200+ store locations via Python and Google Places API; parsed and deduplicated JSON data.
- Modeled sales, margin, and delivery KPIs in SQL; built Excel metrics for rolling averages, MoM changes, and predictive revenue.
- Delivered 9 executive-level visuals with dynamic timeline slicers, regional filters, and branded styling.

Global Assessment Dashboard – McKinsey Solve

- Analyzed 4,000+ synthetic assessment records in Excel to uncover score drivers by demographics, education, and game engagement.
- Designed performance gauges, pass/fail maps, and resume-score correlation charts; recommended targeted prep initiatives.

Healthcare Operations Dashboard – Onyx Data DNA Challenge

- Processed 55,000+ synthetic patient records to map condition prevalence, billing trends, and hospital performance.
- Created two-page Excel report with multi-chart layouts, filtering by condition, insurance, and provider; delivered resource allocation recommendations.

Spotify Streaming Insights (2010–2019)

- Built Excel-based analysis of decade-long streaming data to identify top artists, genres, and playlist impacts.
- Developed segmentations by release year, audio features, and chart presence, visualized trends with PivotTables and charts.

Pizza Sales Optimization (SQL + Excel)

- Leveraged SQL and Excel to analyze 21,350 orders (£817,860 revenue), identifying top-selling pizzas and peak ordering periods.
- Generated actionable insights on inventory planning and promotional targeting to maximize weekend sales.

EDUCATION

MSc Data Science – Leeds Beckett University (Merit)

BSc Information Technology / Business Information Systems – Middlesex University
(Second Class Upper Division)

Advanced Diploma / Advanced Diploma in Software Engineering – Aptech Computer
Education (Credit)

CERTIFICATIONS

- IBM Data Analyst
- Google Data Analytics
- SQL Intermediate Certification
- Microsoft Excel Specialist
