Portfolio: bhenmedia.com

PROFESSIONAL SUMMARY

Data-driven Full Stack WordPress Developer with 7+ years of experience building and optimising high-performance websites for hospitality, healthcare, and corporate clients. Founder of bhenmedia.com combining a B.Sc. in IT and an M.Sc. in Data Science to bridge the gap between technical development, AI integration, and user-centric design. Proven ability to identify operational bottlenecks and build custom, AI-augmented solutions (e.g., LLM-powered chatbots, digital assistants) that solve real-world business problems.

CORE SKILLS

WordPress & Full-Stack

- Custom WordPress Themes & Plugins
- Elementor, Divi & Page Builders
- HTML5, CSS3, JavaScript (ES6), PHP
- WooCommerce Setup & Optimisation
- Domain, DNS, cPanel/Hosting, SSL
- Site Migrations & Security Hardening
- Git/GitHub & CI-style Workflows
- Responsive, Mobile-First Layouts

AI & Data

- AI Chatbot Integration (LLM APIs)
- WhatsApp Business API
- Python (Pandas), SQL, Excel
- Google Analytics 4 (GA4), Search Console
- Performance Tuning & A/B Testing
- KPI Dashboards & Behaviour Analysis
- Power BI & Data Visualisation

Design & UX

- Figma (Wireframes to Prototypes)
 - Component-Based Design Systems
 - Glassmorphism & Modern UI Patterns
 - Accessibility-Aware UX
 - Conversion-Focused Landing Pages
 - Information Architecture
-

PROFESSIONAL EXPERIENCE

Guest Service Assistant *Ibis Styles Leeds City Centre Arena* | Leeds, UK | Sep 2023

- Manages all front-desk night operations, including check-ins, guest support, and reporting, handling high-pressure peak arrival and departure windows.
- Identified repetitive guest questions and operational bottlenecks around the 3pm check-in rush as a key service pressure point.

Self-Initiated Project: [AI Virtual Hotel Concierge](#)

- **Problem:** Observed that peak check-in times (3pm) were bottlenecked by staff juggling check-ins and a high volume of repetitive questions (parking, Wi-Fi, breakfast, etc.).
- **Solution:** Independently designed and built a production-standard AI digital concierge to solve this specific pain point.
- **Build:** Architected a data-first model by collecting and structuring 500+ guest-style questions. Built a full-stack assistant (React, Node.js, WebSockets, MongoDB) integrated with an LLM API, trained on a policy-aware knowledge base to provide instant, accurate answers.
- **Impact:** The system is designed to automate 200+ high-frequency queries, allowing front-desk staff to focus on complex check-ins and high-value guest interactions, directly relieving queue pressure.

Founder & Lead Developer [bhenmedia.com](#) | Leeds, UK & Lagos, Nigeria | 2017 – Present

- Founded and manage a web development practice for SMEs in hospitality, healthcare, and e-commerce.
- Lead end-to-end project lifecycles, from Figma wireframes to full-stack WordPress development, hosting management, and analytics-driven optimisation.
- **Selected Builds:**
 - [Ebluniversal.com](#): Full e-commerce platform for mobile phone parts using WooCommerce, including custom product structures and checkout optimisation.
 - [Slot.ng](#): Contributed to the website revamp for a leading Nigerian mobile phone and electronics retailer, focusing on UI/UX improvements and e-commerce functionality.

- Vivano.com.ng : Led e-commerce implementation for a Nigerian fashion retailer, integrating local payment gateways and managing inventory workflows.
- Rockae.com: Developed a modern, professional website for a business consulting firm, focusing on streamlined navigation and clear information architecture.

Web & Data Analyst Specialist Qalhata Technology | Cheshire, UK | Nov 2024 – Present

- Managed the company's primary corporate website, responsible for translating highly complex AI and autonomous systems concepts into clear, professional web pages for enterprise and government clients.
- **Built and maintained the qalhata.tech.com WordPress site**, focusing on professional UI, responsive design, and communicating complex technical services.
- Acted as the internal "Analyst Specialist," developing **Power BI and Excel dashboards** to track key business metrics, project performance, and client data.
- Used **Google Analytics (GA4)** to analyse web traffic from B2B and government clients, providing reports to leadership on user engagement and lead generation.
- Collaborated with the core AI and data science teams to help **design and build front-end interfaces** (client portals/dashboards) for data visualization.
- Managed all technical web infrastructure, including **hosting, domain/DNS management, and security protocols** to protect sensitive company information.

WordPress Developer Deskstones Ltd | Leeds, UK | Feb 2024 – Present

- Led a corporate website rebuild (WordPress + PHP) aligned with new brand strategy, developing custom enhancements for caching, CDN integration, and performance.
- Implemented GA4 and technical SEO improvements, working directly with senior leadership.
- **Results:** ~45% improvement in page load time, ~30% increase in SEO visibility, and ~25% uplift in conversion rates.

WordPress Developer / Analyst Specialist [Eden Health Care Private \(EHCP\)](http://Eden Health Care Private (EHCP)) | Leeds, UK | 2023 – 2024

- Built a healthcare website and internal web tools integrating WordPress with Oracle Apex.
- Developed Power BI and Excel dashboards for care performance and compliance, automating staff onboarding and scheduling workflows.
- **Results:** ~60% reduction in manual scheduling time and ~25% improvement in staff allocation efficiency.

WordPress Developer *NamTech Solutions* | Remote (Milton Keynes, UK) | 2019 – 2020

- Maintained and improved corporate WordPress platforms with a focus on technical SEO and responsive UX.
- Used Google Analytics to identify underperforming content and guide layout changes.

- **Result:** ~40% increase in monthly web engagement through analytics-led improvements.

WordPress Developer / Digital Media Associate *WAVE (West Africa Vocational Education)* | Lagos, Nigeria | 2017 – 2024

- Modernised the organisational website and designed digital campaigns, infographics, and media.
 - **Key Contribution:** Designed, built, and launched the **WAVE Job Board** (waveacademies.org/wave-job-board), a strategic platform connecting vocational graduates with employers, directly supporting the organization's core mission.
 - **Result:** ~55% uplift in engagement metrics across digital campaigns.
-

SELECTED TECHNICAL PROJECTS

[AI Virtual Hotel Concierge](#) (Hospitality Solution)

- Independently designed and built a full-stack digital assistant to solve the 3pm front-desk bottleneck observed first-hand while working at Ibis.
- Architected a data-first model by training an LLM on a policy-aware knowledge base of 500+ real guest questions.
- Built a real-time chat interface to automate 200+ high-frequency queries (e.g., parking, Wi-Fi, breakfast), freeing staff for high-value check-ins.
- Tech Stack: React, Node.js, WebSockets, MongoDB, LLM API, Figma.

[NHS Procurement Intelligence Dashboard](#) (Live API Project)

- Designed and built an interactive dashboard that makes live HTTP requests to the UK Government Contracts Finder API to fetch and analyse real-time procurement data.
- Implemented JavaScript (async/await) to parse OCDS (Open Contracting Data Standard) JSON responses.
- Developed a custom filtering algorithm to isolate NHS-specific contracts from the main data feed, calculating real-time analytics on contract values and trust activity.
- Engineered robust error handling to gracefully manage government API rate limits (403 errors) and display user-friendly messages.
- Tech Stack: Live RESTful API, ES6+ JavaScript, Chart.js, OCDS JSON Parsing, HTML5.

[GreenGri Hub™](#) (Live Data Dashboard)

- *Shows competence with APIs and dynamic data visualization.*
- Built a real-time dashboard integrating live UK Government APIs and weather data, featuring a custom-designed diagnostic UI panel.
- Tech: JavaScript ES6+, Chart.js, REST APIs, Responsive CSS Grid layouts.

Care AI (Cognitive Adaptive Rights-based Engagement Platform)

- Developed a React-based Single-Page Application (SPA) to support paediatric patients, implementing all 10 international i-SUPPORT standards for rights-based clinical care.
 - Engineered an age-adaptive AI chatbot (using the Anthropic Claude API) to provide emotional support and explain procedures in child-friendly language.
 - Designed a multi-stakeholder interface with distinct portals for children, parents (progress dashboard), and clinicians (analytics and compliance tracking).
 - Tech Stack: React 18, Tailwind CSS, Anthropic Claude API (Sonnet 4), SPA.
-

EDUCATION & CERTIFICATIONS

MSc Data Science *Leeds Beckett University, Leeds, UK (2023)*

- Focus: Big Data analytics, machine learning, business intelligence

BSc Information Technology & Business Information Systems *Middlesex University, London, UK (2017)*

Advanced Diploma in Software Engineering *Aptech Computer Institute, Lagos, Nigeria (2016)*

- **IBM Data Analyst Professional Certificate**
- **Google Data Analytics Professional Certificate**
- **Google Analytics Individual Qualification**
- **Website Development Certification (Distinction)**
- **SEO Specialist Certification**
